DETAILED ACTION***Election/Restrictions***

Newly submitted claims 21-28 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because layer of filter paper is not required to have a thickness to remove and trap lipids. The subcombination has separate utility such as with a coffee maker not requiring a spout for delivering heated water.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 21-28 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Newly submitted claims 8-20 will be examined along with the original claims.

Reissue Applications

The original patent, or a statement as to loss or inaccessibility of the original patent, must be received before this reissue application can be allowed. See 37 CFR 1.178.

The reissue oath/declaration filed with this application is defective (see 37 CFR 1.175 and MPEP § 1414) because of the following:

While the declaration does state that the applicant is the sole owner, there is no statement that he is the sole inventor.

Claims 1-20 are rejected as being based upon a defective reissue declaration under 35 U.S.C. 251 as set forth above. See 37 CFR 1.175.

The nature of the defect(s) in the declaration is set forth in the discussion above in this Office action.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 9 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 9 is rejected under 35 U.S.C. 251 as being based upon new matter added to the patent for which reissue is sought. The added material which is not supported by the prior patent is as follows:

The open ended range of newly submitted claim 9 (of at least 3 bar).

It should be noted that all references cited in the original patent must be made of record in the Reissue application. Since the original patent cited numerous references, applicant should provide these references on a 1449 in response to this office action.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 8, 17 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Shigenobu et al.

There is disclosed in Shigenobu a beverage brewing device comprising: a spout 103 for delivering heated water under high pressure to ground coffee beans; a receptacle (cup, not shown) to receive brewed filtered coffee; means 13 defining a flow path between the ground coffee beans to the receptacle, comprising: a metallic permanent filter 20; and a layer of filter paper 30.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2, 3, 19 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shigenobu et al in view of Krebs.

Art Unit: 1761

Krebs discloses that it is known in the filter art to form a filter 10 of multiple layers 12, 14. It would have been obvious to one skilled in the art to modify the filter assembly of Shigenobu with that taught by Krebs and form the filter of multiple layers, in order to improve the efficiency of the filter. The formation of the multiple layers together by crimping is an obvious matter of design choice, since the over all effectiveness of the filter is not contingent upon the way the layers are formed.

Allowable Subject Matter

Claims 4-7 and 9-16 are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Reginald L. Alexander whose telephone number is 703-308-1594. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Milton Cano can be reached on 703-308-3959. The fax phone numbers for the organization where this application or proceeding is assigned are 703-305-7718 for regular communications and 703-305-3599 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0661.
